**UCLA Medical Center, EPA, ASHRAE and Health Canada
ALL AGREE that ANY LEVEL OF C O ABOVE 10 PPM is
Very UNHEALTHY AIR**

New, much smaller, very portable, versatile C O Monitors to use in their Home, vacation Home or cottage, RV, Tent, Car, Truck, Airplane, Boat, Workplace Hotel / Motel while traveling **and on their Person daily to Protect themselves from C O Poisoning 24-7-365.**

Designed to be utilized to fit your needs and Lifestyle This New “Triangle of C O Safety” can be “Wall Mounted”, using the mounting bracket included, or sit upright using the unique little mounting stand, making it perfect to sit upright in a vertical position on any bed stand, dresser, bookcase shelf or on any other flat, unobstructed surface where it has free access to the air in the room. [as pictured at right].

In addition you can simply put it in your shirt pocket or wear it in a holster clipped to your belt, or the ladies could carry it in their purse when between home, car, or at work where it can be put in a proper location for **Personal C O Protection 24-7-365.**

WHO NEEDS LOW LEVEL C O PROTECTION MOST URGENTLY?

George E. Kerr, CEO / Founder

Pregnant Women, Infants, Young Children, the Elderly, and people with Chronic Medical Conditions are at FAR Greater Risk when they have elevated levels of COHb. All persons with serious illnesses will start to suffer much more due to "Oxidative Stress" which increases as a result of even very low levels of Chronic Low Level C O Poisoning. People having Asthma, Bronchitis, Emphysema, Heart Disease or Anemia will experience extreme difficulty in breathing. Intense, increased strain on both the Cardio-Vascular and Respiratory systems caused by "OXIDATIVE STRESS" resulting from even slight increases of COHb COULD BE FATAL.

The UCLA Medical Center's Scientific Medical Studies confirm that NO HOME can be a "Healthy Home" unless it is being monitored for Chronic Low Levels of C O of 10 PPM.

Every Home can now be: "In Control of, not at the Mercy of", C O Poisoning 24-7-365.

NO ONE, from the Fetus to the Grave need ever suffer from C O Poisoning again.

Read, consider carefully and pass along to everyone you know, that in addition to all of the previous Scientific Medical findings concerning the tragic effects of elevated COHb and poor "Air Quality" on the Fetus, Newborn, infants and our young children, there is now strong evidence, **as highlighted on a recent CNN News Special Report, that "Poor Air Quality, including increased levels of COHb may be a leading cause of the huge, sudden increase in Autism as well as Asthma in our children. These rapid increases are occurring FAR too rapidly for them to be resulting from heredity causes.**

Pushing the "Test Button" on a C O alarm DOES NOT MEAN the C O alarm will Detect and alarm at Dangerous Levels of C O the next time they occur in your home..

ONLY Testing with real Certified C O "Test / Bump" gas will do that. Actual, Certified C O "Test / Bump" gas is the only way to truly test your C O alarms, to make absolutely sure it will protect your Family. C O Test Gas is available from C O – Experts at: gekerr@tds.nett

Simply put a C O – Experts Low Level C O "Health" Monitor into the plastic test bag side by side with any Bran Name UL-2034 or CSA-6.19 Listed C O alarm, zip the bag closed except for just enough room to insert the straw attached to the aerosol can of C O Test gas and Squeeze the trigger on the test gas can ONE QUICK squeeze. Quickly remove the straw and close bag's zipper tightly. Within seconds the Monitor will start giving both audible and visual warnings of the level of C O it is detecting. Touch the "Silence" button on the Monitor, and look at your watch or a clock and listen and watch to see how long it is before the UL or CSA C O alarm sounds an audible warning. Each and every passing minute of breathing this UNSAFE AIR is putting you nearer to the 911 Call, and your likely visit to the Hyperbaric Therapy Medical Center.

A Kidde-Nighthawk Model #KN-COPP-3 says: **"Pregnant women, infants, children, senior citizens, persons with heart or respiratory problems and smokers may experience symptoms at lower levels of exposure than noted. Individuals with medical problems may consider using warning devices which provide audible and visual signals for carbon monoxide concentrations under 30ppm."**

PRO-TECH and their parent company S-Tech, ; as well as First Alert and other UL-2034 Listed C O alarm manufacturers HIDE BEHIND Liability Disclaimers such as: **"Individuals with medical problems may consider using warning devices which provide audible and visual signals for carbon monoxide concentrations under 30ppm."**

The above is TRUE of every UL-2034 / CSA-6.19 Listed C O alarm.
